## Education

**AISSMS Institute of Information Technology, Pune**

**2024–2028**

B.Tech in Computer Engineering

CGPA: 7.82/10

**Rajiv Gandhi Academy of E-Learning School & Jr. College**

Class XII (MSBSHSE): 78.33% (2024)

**City International School**

Class X (CBSE): 94.6% (2022)

## Projects

**Complaint Management System** | *HTML, CSS, JavaScript, FastAPI, SQLite*

**March 2026**

- Developed a full-stack complaint management system with role-based authentication.
- Implemented complaint submission, automatic staff assignment, complaint tracking, notifications, file upload support, and chat-based communication.
- Developed RESTful APIs using FastAPI and integrated SQLite for complaint management, filtering, and CSV report generation.
- Designed responsive dashboards using HTML, CSS, and JavaScript to provide an intuitive user experience.

**Donex –NGO Assistance Platform** | *HTML, CSS, JavaScript, FastAPI, SQLite*

**January 2025**

- Collaborated in a team to develop a web-based platform connecting donors with NGOs for efficient donation management.
- Designed and developed the frontend using HTML, CSS, and JavaScript, creating responsive and userfriendly interfaces.
- Integrated frontend components with the FastAPI backend and SQLite database to ensure seamless functionality.
- Contributed to improving the user experience through intuitive interface design and responsive layouts.

**Social Media Trend Analyzer** | *Python, Reddit API, Pandas, Scikit-learn, TextBlob*

**April 2026**

- Developed a Python-based application that collected Reddit posts using the Reddit API and stored structured data in CSV format.
- Performed text preprocessing and applied NLP techniques, including CountVectorizer and n-gram analysis, to identify trending keywords.
- Implemented sentiment analysis using TextBlob to classify posts as positive, negative, or neutral.
- Utilized Pandas and Scikit-learn for data processing, keyword extraction, and trend analysis.

**College Technical Event Management System** | *Java, Java Swing, MySQL, JDBC*

**May 2026**

- Developed a desktop-based event management system for organizing college technical events and participant registrations.
- Designed an interactive graphical user interface using Java Swing for event creation, registration, and record management.
- Integrated MySQL with Java using JDBC to perform CRUD operations on event and participant data.
- Built and tested the application using Eclipse IDE and MySQL Workbench to ensure reliable database connectivity and functionality.

**Smart Meter Monitoring Prototype** | *HTML, CSS, JavaScript*

**March 2025**

- Developed a prototype web application to monitor real-time electricity consumption from smart meters.
- Designed an interactive dashboard for visualizing energy usage and consumption patterns.
- Built a responsive and user-friendly interface to display real-time monitoring data effectively.

## Technical Skills

**Programming Languages:** C++, Java, Python, JavaScript

**Frontend :**HTML, CSS

**Backend :**FastAPI, REST APIs **Developer Tools:**Git, GitHub, VS Code, Eclipse IDE, MySQL Workbench, Jupyter Notebook, Canva

**Libraries and APIs:** Pandas, Scikit-learn, TextBlob, Requests

## Certifications

- Building Generative AI Apps to Talk to Your Data – GeeksforGeeks
- Advanced Software Engineering Job Simulation – Walmart (Forage)
- Java DSA – Unstop
- Probability and Statistics Mastery – Unstop
- Drupal Spoken Tutorial – IIT Bombay
